

Students' internet dependence prevention program development

Kazan Federal University, 420008, Kremlevskaya 18, Kazan, Russia

Abstract

© 2017. Leisure forms for young people built on the information and computer progress possibilities not only appear outside the field of social workers', psychologists', teachers' activity, but also create the effect of each young person's isolation from an "adult" audience. The authors classify the Internet dependence emergence causes on social networks among students (14-18 years old), which affects professional and personal socialization. The author's program aimed at Internet dependence preventing on social networks was developed and tested.

Keywords

Addictions, Communication, Internet dependence, Prevention, Student youth
